

PANDI RITHESH RAJA

Full Stack Developer | Python Java React . SQL Rest APIs . Git .Cloud

23hr1a3045@gmail.com | +91 9347718219 | linkedin.com/in/pandiritheshraja | github.com/rithesh2130-beep | India

PROFESSIONAL SUMMARY

B.Tech student in AI & Data Science (CGPA: 7.5) with hands-on experience building end-to-end web applications, REST-integrated backends, and cloud-connected pipelines. Proficient in Python, Java, SQL, React, and Git. Hackathon Winner (1st Place) for engineering a production-grade AI platform with a real-time backend. Seeking a Full Stack Developer Internship to deliver scalable, user-centric software.

TECHNICAL SKILLS

Languages: Python, Java (OOP), SQL, HTML5, CSS3, JavaScript (Basic)

Frontend: React.js, Component Architecture, Responsive UI/UX, CSS Layouts

Backend / APIs: Python Scripting, REST API Design, Data Pipelines, ETL, Flask

Databases: MySQL, SQLite, BigQuery (GCP), Database Design, Query Optimisation

Cloud & BI: Google Cloud Platform (BigQuery, Looker), Power BI, Tableau

Dev Tools: Git, GitHub, VS Code, Jupyter Notebook, Linux CLI

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

PROJECTS

Drishta-AI — Full Stack AI Safety Platform | ■ 1st Place Hackathon

Python · ML · Backend · Feature Engineering · Git | 2026 | github.com/rithesh2130-beep/drishta-ai

- Architected end-to-end AI platform with feature engineering pipelines, ML classification models, and real-time backend achieving sub-second response times.
- Designed modular, reusable backend components for large-scale data ingestion and inference; improved prediction accuracy 30% over baseline.
- Applied Git version control, modular code structure, and documented APIs; awarded 1st Place at a competitive inter-college Hackathon.

Cloud Analytics Dashboard — Loan Insights Web App

BigQuery · SQL · Looker · Google Cloud Platform · Python | 2026 | lnkd.in/gK-uHCVh

- Built full cloud-to-dashboard pipeline: BigQuery ingestion, complex SQL transformations, and interactive Looker KPI dashboard (\$3.08B loans, status distributions).
- Developed Python ETL scripts achieving 100% data quality; deployed end-to-end on GCP with IAM configuration and scalable storage management.

AI Reflex Arena — Human Reflex Data Platform

Python · Data Visualisation · UI/UX | 2026 | github.com/rithesh2130-beep/AI_Reflex_Arena

- Built interactive real-time data collection platform with KPI dashboards; optimised UI/UX workflows improving data collection efficiency by 40%.

Full Stack Web Applications — Personal Portfolio Projects

React.js · HTML5 · CSS3 · JavaScript · Git | 2025–2026

- Engineered a multi-step flight booking system in React with dark-themed responsive UI, component state management, and dynamic form validation.
- Built card-based personal web apps with media integration, conditional rendering, and cross-browser CSS layouts demonstrating end-to-end frontend architecture.

EXPERIENCE

Software Development & Engineering Projects (Self-Directed)

Python · React · SQL · GCP · Git | 2024 – Present

- Independently designed, built, and deployed 4+ software projects spanning frontend UIs, backend pipelines, cloud infrastructure, and ML systems.
- Practised iterative development: incremental feature delivery, GitHub version control, and structured documentation across all projects.

EDUCATION

B.Tech — Artificial Intelligence & Data Science | CGPA: 7.5 | 3rd Year | 2023 – 2027 (Expected)

Relevant Coursework: Data Structures & Algorithms · OOP · DBMS · Operating Systems · Computer Networks · Software Engineering · ML · Statistical Modelling

Intermediate (MPC) — Mother Theresa Junior College | 86.2% | 2021–2023 **SSC** — Elena Bettini High School | 96% | 2021

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud Data Analytics Certificate (2026) — BigQuery, SQL, Looker, Cloud Workflows | Credential on Credly
- SQL for Data Analysis & Power BI for Data Analysts — In Progress (Expected April 2026)
- 1st Place — Inter-College Hackathon (2024): Drishta-AI outperformed multiple teams on real-world ML evaluation
